Data Analyst skilled in SQL, Power BI, Tableau, Excel, and Azure Databricks, with close to three years of experience in HR and recruitment. Recently completed a data analyst internship at Frezio, turning website and candidate data into live dashboards and prioritised recommendations.

SELECT ACHIEVEMENTS:

- Connected **Google Analytics 4 to Google BigQuery** and wrote the SQL behind a **live dashboard that refreshes on its own** for Frezio, replacing manual data pulls.
- Built **funnel and match-score analyses** that pinpointed where candidates dropped off and which skills most affected outcomes, and turned them into prioritised suggestions for the product team.
- Found **1,809 employees marked "Active"** who already had a termination date in a 22,211-employee HR dataset; choosing the right status column changed the attrition figure by **almost half**.
- Awarded **3rd Most Valuable Intern** in my internship cohort and named **1st Most Valuable Player** of the cohort in the Full Stack Data Professional Program; shared analytics content with **10,000+ LinkedIn followers**.

ANALYTICS EXPERIENCE

Data Analyst Intern — **Jul 2026 – Oct 2026**

FREZIO — **MELBOURNE, VIC (REMOTE)**

- Agreed on the business question and the metric that would answer it with the manager before starting any analysis.
- Built **funnel and match-score analyses** to find where candidates dropped off and which skills had the biggest effect on outcomes, and turned the drop-off points into suggestions for the product team.
- Connected website data from **Google Analytics 4 to Google BigQuery** and wrote the SQL behind a live dashboard that refreshes on its own.
- Audited and standardised inconsistent source data (naming variants, missing values, gaps) and noted what each dataset could not tell us, so reports could be relied on.
- Automated data collection and scoring with **Google Apps Script** and an AI step that follows fixed rules, keeping results consistent and removing manual data entry.
- Presented findings to managers as a short story with recommendations ranked by priority, through **Power BI dashboards** and executive summaries.
- Awarded **3rd Most Valuable Intern** in my cohort.

Tools: Excel, SQL, Google BigQuery, Google Analytics 4, Power BI, Google Sheets, Apps Script

RELEVANT PORTFOLIO

HR Workforce Dashboard | Tableau [Link]

- A 22,211-employee company needed one view answering 12 workforce questions: hiring trends, attrition, remote vs HQ, tenure, department structure, and age, gender, and race diversity.
- Built a one-page interactive dashboard with **8 KPI cards** from calculated fields, click-to-filter actions across every chart, and a department-to-job-title drill-down; hid unused fields so employee names stayed out of the published workbook.
- Found **1,809 employees marked "Active"** who already had a termination date. Two status columns disagreed, and choosing the right one changed the attrition figure by almost half.

Employee Attrition & Flight Risk Dashboard | Power BI

- Modelled 1,000 employee records in Power Query as a **four-table star schema** to see where and why staff were leaving; overall attrition was 21% (210 exits).
- Showed Sales, Operations and Finance ran at **23–25% attrition** against 13% in Marketing, and remote Victorian staff left at 24.5% compared with about 19% in office.
- Wrote a **DAX flight-risk score** for current staff using satisfaction, workload, manager rating, and time since last promotion, and recommended targeted pay and workload reviews in the three highest-risk departments rather than a company-wide fix.

HR Attrition Analysis | Azure Databricks, Spark SQL

- Set up an Azure Databricks workspace (Australia East) with a cost-aware single-node cluster, Unity Catalog, and auto-termination, and loaded the CSV into a governed table.
- Used **Spark SQL** with CASE WHEN and window functions to calculate attrition metrics: **87% of exits were voluntary**, and better opportunity, pay, and growth accounted for over half of them.

Everyday Rewards Loyalty KPI Dashboard (Woolworths data) | Power BI

- Tracked member sign-ups against trend, points earned vs redeemed across 2024–25, redemptions by type (shopping, fuel, Qantas Points, donations) and active, suspended and inactive membership.
- Ranked stores by points earned and plotted redemption against earning for each location, with drill-through from store KPIs down to the members behind them.

Kmart Sales Performance Dashboard | Excel

- Analysed **$3.19M of transactions** by financial year, category, suburb, state and channel with pivot tables and slicers. In-store made up 79% of revenue against 21% online, and Frankston was the top suburb; flagged weaker categories and suburbs for follow-up.

EARLIER EXPERIENCE

Career Break **May 2022 – Jan 2026**
FAMILY AND RELOCATION TO AUSTRALIA **MELBOURNE, VIC**

- Planned break for family. Used the later part of it to retrain in data analytics (Excel, SQL, Power BI, Tableau, and Azure Databricks) and build the portfolio above.

Teacher **Apr 2020 – Apr 2022**
MODERN WORLD SCHOOL **PUNE, INDIA**

- Kept progress records and produced regular reports for parents and school leadership, tracking each student against development milestones.
- Created digital content and ran the school's social media, growing engagement with the parent community.

Senior HR Generalist (promoted from HR Generalist) **Jan 2015 – Jul 2016**
ADDREC SOLUTIONS PVT. LTD. **AHMEDABAD, INDIA**

- Carried out market mapping and salary benchmarking to advise hiring managers on candidate availability, role scope, and offer levels.
- Ran recruitment for several roles at once and kept the trackers that gave the business a live view of pipeline progress against hiring targets.
- Reviewed which online job platforms brought the strongest response and used that to guide where future ads went.
- Kept candidate records and compliance checks accurate across a high-volume workload; **promoted within 13 months**.

HR & Admin Coordinator **Jun 2013 – Apr 2014**
KHUSHI ADVERTISING IDEAS PVT. LTD. **AHMEDABAD, INDIA**

- Coordinated recruitment and internal communication in a client-driven advertising agency, and kept employee files audit-ready.

CORE COMPETENCIES

- **SQL:** MySQL, Google BigQuery, Spark SQL (Azure Databricks), joins, aggregation, CASE WHEN, window functions (ROW_NUMBER, RANK, DENSE_RANK, NTILE)
- **Power BI:** Power Query, DAX measures, star-schema data modelling, drill-through, KPI dashboards
- **Tableau:** Calculated fields, KPI logic with COUNTD, dashboard filter actions, dual-axis charts, container layouts, Tableau Public
- **Excel:** Pivot tables, formulas, slicers, charts, interactive dashboards
- **Other Tools:** Azure Databricks, Google Analytics 4, Google Sheets, Google Apps Script, GitHub, Microsoft Office; learning Python (pandas, Matplotlib)
- **Analysis:** Data cleaning and validation, KPI reporting, trend and segment analysis, funnel and user drop-off analysis, root-cause investigation
- **Communication:** Executive summaries, dashboard design for different audiences, presenting to non-technical stakeholders

EDUCATION

THE DATA & AI INSTITUTE | Australia
Full Stack Data Professional Program, Named **1st Most Valuable Player** of the cohort

UVPCE | Gujarat, India
Master of Computer Applications (MCA), 2013, CGPA 7.87

B P COLLEGE OF COMPUTER STUDIES | Gujarat, India
Bachelor of Computer Applications (BCA), 2010, 83.3%

PROFESSIONAL DEVELOPMENT

Product Analytics: From Metrics to Business Impact, Great Learning, Jul 2026 | Recruiter Training: Talent Acquisition Beginner to Advanced, Udemy, Jan 2025 | Scrum Master Certified (SMC), Udemy, 2024
